**Beware, this online test version is only a very restricted overview of Reptition Detector 1.**

**Download for free** Repetition Detector 1 or its successor Repetition Detector 2 to enjoy a lot of new functionalities.

4

: minimal word size to manage (between 3 and 10)

5

: minimal word count to set a "distant repetition" (between 3 and 7)

1500

: distance (in letters) of text area for a "distant repetition" (between 200 and 4000)

100

: distance (in letters) of text area for a "close repetition" (between 10 and 400)

: word list to forget

Write here the text to compute:

```
libvenge-dev \  
libsigc++-2.0-dev \  
libsoup2.4-dev \  
libvisio-dev \  
libwpd-dev \  
libxslt1-dev \  
python-lxml \  
zlib1g-dev \  
google-mock \  
libgtest-dev \  
fonts-dejavu \  

```

Process

y un programa gratis para Windows (también funciona en Linux con Wine) es:

**Repetition-Detector**

## Repetition Detector 1.02

[Me gusta](#) [Regístrate para ver qué les gusta a tus amigos.](#)

### Repetition Detector 1.02 Description:

Repetition Detector is a simple, small and easy-to-use software which allows you to detect repetitions in texts.

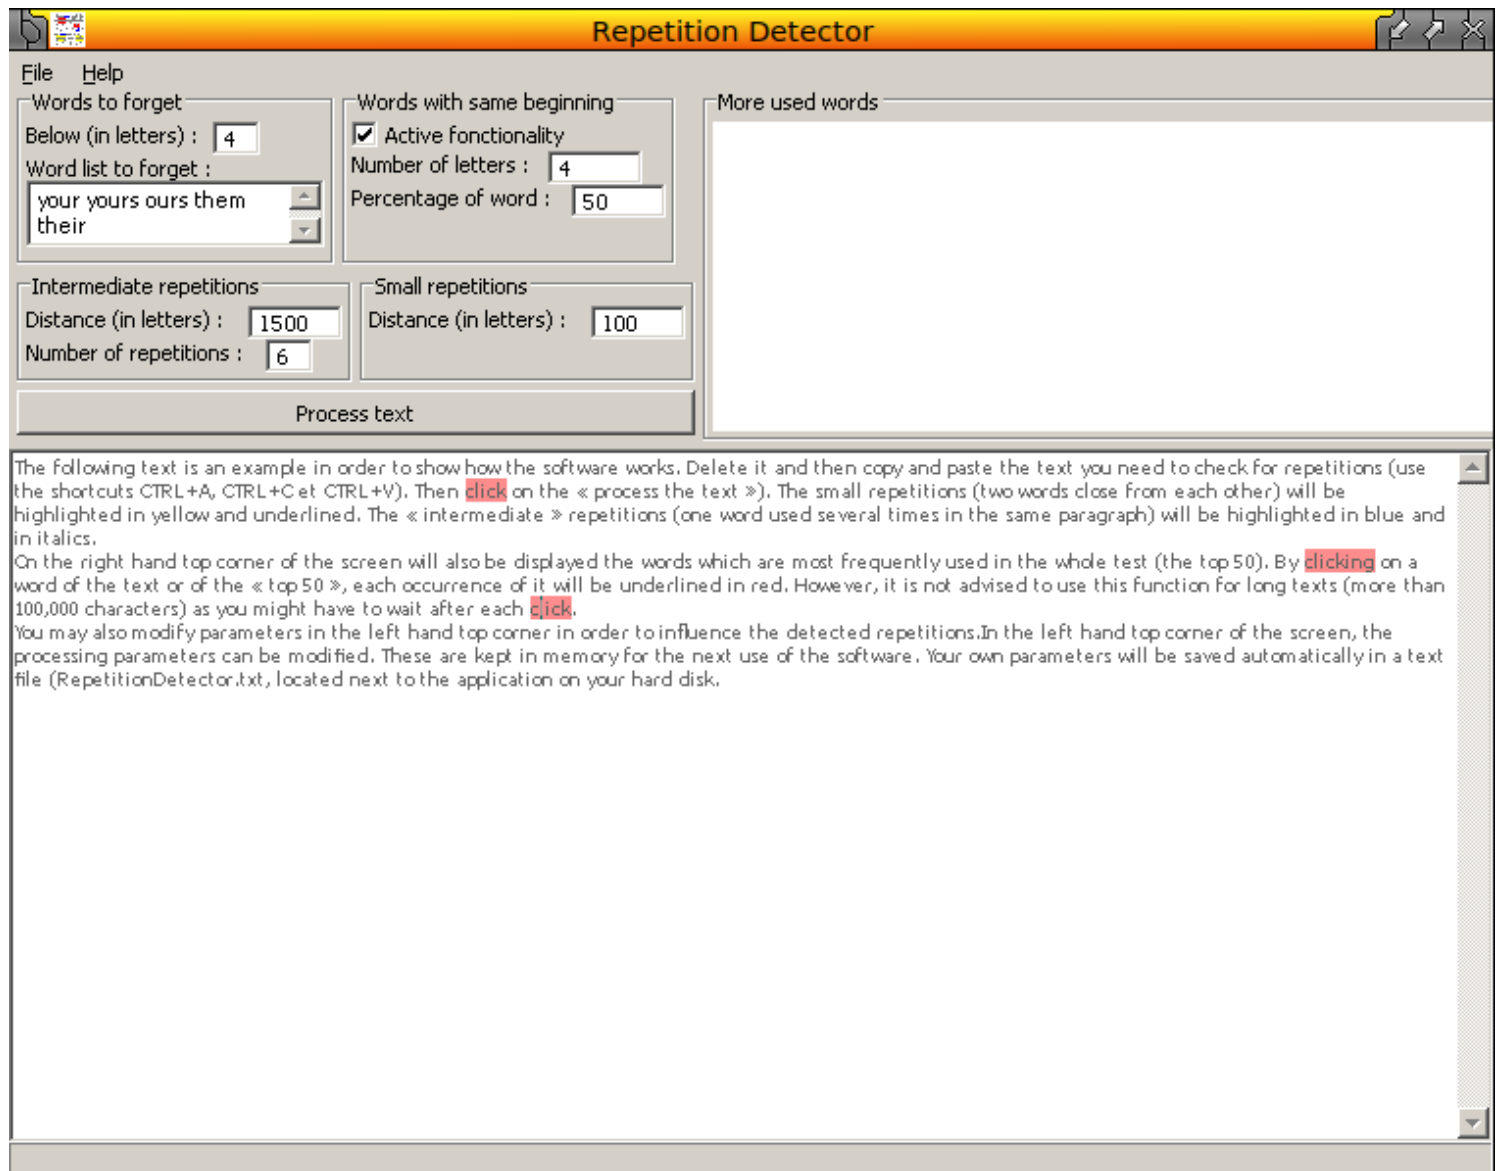

### Repetition Detector 1.02 Features:

- Process text without size limitation
- Word and letter count.
- Top 50 of most frequently used words.
- Highlight small repetitions (two identical words which are close).
- Highlight intermediate repetitions (words used too often inside two or three pages).
- Highlight each occurrence of a word by clicking on it
- Take into account similar words, i.e. with same beginning
- Customizable and automatically saved parameters
